

DUAL CAMERA WIRED REVERSE SYSTEM INSTALLATION GUIDE

Dear Valued Customer,

**Thank you for choosing the Dual Camera
Wired Reverse System. We appreciate your
trust in our product. Installing the system
is straightforward—simply follow
the diagram and instructions below.**

PACKAGE CONTENTS

Please ensure all components are
included before proceeding:

- 1 x 7" Car Monitor
- 1 x Backup Camera
- 1 x Aviation Connector Cable
- 1 x Remote Controller
- 1 x Mount Bracket
- 1 x Two-Sided Adhesive Tape
- 1 x User Manual

INSTALLATION STEPS

1. Monitor Connection

- Locate the red, black, and green extension cables connected to the monitor.
- Align the 6-pin monitor connector with the interface, following the directional arrow for proper alignment.

2. Power Connections

- Connect the **red cable** to a 12V positive power source.
- Connect the **black cable** to a ground power source.
- The **green cable** acts as a reverse trigger:
 - If connected to the positive reverse power, the monitor will automatically display the AV2 image when the reverse gear is engaged.

3. Camera Connection

- Attach the camera to the monitor using the video cable.
- Mount the camera in your desired position.

4. Monitor Channels

- The monitor supports two channels:
 - **Yellow Port (AV1)**
 - **Black Port (AV2)** (prioritized when the reverse trigger is activated).
- To switch between AV1 and AV2, use the button on the monitor or the remote control.
- If the green cable is connected to a positive reverse trigger, ensure the camera is connected to the **black port (V2)** for proper functionality.

5. Camera Placement

- Install the camera in a position that minimizes blind spots, allowing for optimal full-angle monitoring while driving.

6. Final Check

- Refer to the installation diagram and verify that all components are securely connected and functioning correctly.

Thank you for choosing Lil Rippa, if you have any questions feel free to contact us at:
